

FISCAL NOTE
SB 1582 - HB 1908

April 5, 2005

SUMMARY OF BILL: Changes the student membership data that is used for calculating the Basic Education Program (BEP) funding from *prior year average daily membership* to *current year average daily membership*. Currently, the BEP generates funds based on prior year ADM (regular education), FTEADM (vocational education), and I&S (special education).

ESTIMATED FISCAL IMPACT:

Increase State Expenditures - Exceeds \$30,000,000 One-Time
Increase Local Govt. Expenditures - Exceeds \$9,000,000 One-Time*
Increase Local Govt. Revenues - Exceeds \$30,000,000 One-Time

Assumptions:

- This bill will provide funding for local education agencies (LEAs) based on the number of students that are currently enrolled instead of on prior year enrollment.
- The Department of Education currently notifies school systems in July as to their funding for the current year.
- The fiscal impact was estimated by comparing the 2003-04 BEP model's ADM, FTEADM, and I&S counts to actual 2003-04 student numbers.
- Since final student counts for LEAs are not available until the end of the school year, implementation of this bill would require either:
 1. Payments be made to LEAs based on partial-year student counts, in which case LEAs may find themselves receiving windfalls or bills for repayment at the end of the school year, depending on how final average student counts compare to preliminary counts during the year, or
 2. Funds would be paid at the end of the school year once all student counts have been verified.

*Article II, Section 24 of the Tennessee Constitution provides that: *no law of general application shall impose increased expenditure requirements on cities or counties unless the General Assembly shall provide that the state share in the cost.*

CERTIFICATION:

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.
